LOUIS DEMESLAY

Software engineer student

EDUCATION

SCHOOL 42, Paris

Software engineer school
2019 - now

ECONOMICS AND MANAGEMENT

University of Toulouse II
2013 - 2016

PROFESSIONAL EXPERIENCE

KIMBERLEY TREE CARE - TREE LOOPER

Broome, WA, Australia

Feb. 2018 - Feb. 2019

In this job I was leading three people, we were most of the time working in Aboriginal communities in the Australian outback, chopping trees down to avoid damage during the wet season where cyclons are recurrent.

RGIS - INVENTORIST

Toulouse, France

Jun. - Dec. 2017

My assignment in the company was to make inventories of large stores at night, this mainly taught me how to work as a team. This is also the first company that gave me the opportunity to lead a small team.

TMK - TELEMARKETER

Toulouse, France

Jun. 2016 - Mar. 2017

My mission in the company was to call prospects and sell them renovation for their house over the phone. This experience brought me a lot of skills in sales, taught me how to convince people, how to deal with refusal, how to capture the attention of your potential client, but most of all how important this is to know your product and your competitors.

LANGUAGES

English: fluent

Spanish: intermediate

SKILLS

C / C++ : The first part of my formation was mainly C and C++, I did many projects to understand the core of those languages (rewrite http server, ray casting engine, recode all the standard c library and all the STL container, code a simple implementation of a shell...).

Python : I did a AI python bootcamp where I learned the basics of neural network, how to use tensorflow for image recognition and text predictions

Docker / Kubernetes : I have used docker and Kubernetes in some projects in school, I learned how to install, connect and manage an infrastructure with different databases and services.

Linux: I am used to work with a Linux environment, I am very comfortable with basic and intermediate shell commands.
